

# **Guess Who's Coming to Town**

**Words and Music by Gary Soloman**

**Guess who's coming to town  
Going to be here before the sundown  
She's coming home  
Her heart's beating in time going to leave the past behind  
And take fate and a chance  
She's got nothing to lose she is living life that she chooses  
Living for the moment**

**North, South, East and West  
She knows the place she likes the best  
Inside her heart  
Guess who's coming to town going to be here before the sundown  
She is coming home**

**And when the last song is sung and another one just begun  
About a thousand miles down the road  
When she gets up under the lights  
Her eyes shine in the night  
She sings out Jimmy and she loves you**

**Guess who's coming to town going to be here before the sundown  
She's coming home  
She's coming home  
She's coming home**
